THE ADVANCED 4-IN-1 DIGITAL X-RAY IMAGING SYSTEM

Green X 18 is an advanced 4-in-1 digital x-ray imaging system that incorporates Pano, Ceph (optional), CBCT, and Model Scan. With Vatech's extensive experience in the dental imaging field, the Green X provides high-quality images with lower radiation by combining image processing. This will improve your diagnostic accuracy and lead to increased treatment planning and patient satisfaction.

MULTI FOV SELECTION

Green X 18 offers a range of selectable fields of view. The Multi FOV option allows users to select the optimum FOV mode while minimizing exposure to areas that are not in the region of interest. The selection includes the following FOV sizes for diagnostic needs: 18x15, 16x11, 8x8, 8x5, 5x5 and 4x4. These options cover the full arch region, sinus and left/right TMJ, and suits most oral surgery cases and multiple implant surgeries.

Similar UI/UX to EzDent-i & Ez3D-i

EzOrtho's UI/UX is similar to that of EzDent-i and Ez3D-i, increasing familiarity and reducing time spent learning a new software.

The screenshot shows the EzOrtho software interface. On the left, there is a 'RECORDSET' panel with 'Images' and 'LAYOUT' sections. The 'Images' section shows a grid of image thumbnails. The 'LAYOUT' section has buttons for 'Photo Label', 'Photo Label', 'Ceph Label', and 'Ceph Label'. The main area displays a 3D model of a patient's head in profile, with a corresponding X-ray image to its right. Three numbered callouts (1, 2, 3) are overlaid on the interface to highlight key features.

- 1 Tools for the image reading : panning, zooming, measuring and more.
- 2 Selection of Recordset & layout, windowing and create 3D photo etc.
- 3 Displays the image corresponding to the selected layout.

Simple Model Analysis

Measure just one tooth.
EzOrtho™ automatically calculates the length of the remaining teeth and instantly provides the results of the four model analyses.

The sequence shows the model analysis process. The first screenshot shows a 3D model of a tooth with red dots marking mesial and distal points. The second screenshot shows a calibration input field with the value '17.75' and an 'Update Calibration' button. The third screenshot shows the 'Model Analysis' report, which includes data for the Maxilla and Mandible, such as tooth lengths and arch length discrepancies.
